

A diffuser is a special device uniquely designed to dispense natural essential oils into the atmosphere. It is the most effective way to finely vaporize essential oils without harming or altering their vital components and valuable properties. Our affordable and attractive jet system diffuser combines the benefits of super fine essential oil mist, oil efficiency, all inert components, and an easy cleaning feature.

Diffuser Features

Highly efficient jet nebulizer. Our jet nebulizer is the product of over ten years of research and development. It is precision engineered from a special inert material to produce super fine essential oil mist. This virtually indestructible jet will last a life time if cared for properly. For your convenience, our new and improved jet will thread directly onto our essential oil combination bottles.

Beveled drop shape Pyrex™ glass piece. Our glass piece is made from laboratory grade Pyrex™ glass which is formed and then tempered for strength in an 1800° scientific kiln.

All inert components. All of our diffuser components have been carefully researched and chosen to preserve the delicate synergy of essential oils. Unlike metal, the special jet material and Pyrex™ glass will not cause oxidation.

Handmade ceramic base or oak case. The attractive base is hand made from natural ceramic clay. Our Deluxe model features an oak case and three of our most popular essential oil combinations.

A compact and quiet air pump. Our diffusers feature a Tetra Whisper air pump or Rena Air 200 pump with adjustable air control valve. All pumps are engineered for years of quiet, trouble-free service. An on/off switch is included at no extra charge.

An easy clean feature. In the event that dust, lint or other debris clogs the jet nebulizer, simply placing your finger over the small air hole located at the top of jet will rapidly dislodge the particle.

Instructions

Please read carefully before operating your diffuser.

Assembly

- 1) Fill the provided 15cc bottle up to 3/4 full with your selected pure essential oil or pure essential oil blend. Be sure that the teflon dip tube is pushed firmly into the inlet on the bottom of the jet. Do not overfill.
- 2) Firmly thread the white jet onto the 15cc bottle. The jet may be threaded onto any 18 mm bottle with a European finish. **NOTE:** Do not attempt to thread the jet onto any other type of bottle. The threads will be different causing possible leakage and damage to the jet. If in doubt, check the bottom of the bottle. If it says “15 mL” then it will probably work with the jet. If the bottle says “½ oz. or 0.5 oz.” then it is not a European bottle and should not be used.
- 3) Place the filled bottle into the ceramic base (regular model) or into the side slot provided inside the oak case (deluxe model).
- 4) Insert the flexible air tubing into the inlet on the side of the white jet.
- 5) Push the other end of the flexible tubing onto the air outlet of the pump.
- 6) Insert the drop shape glass into the top of the jet (if you have a deluxe model, close the lid on the oak box before inserting the glass) . To avoid leakage, the glass must be “locked” into place. To lock the glass into place, push down lightly on the glass while twisting it 1/16 of a turn.
- 7) Plug in the air pump. Be sure that the on/off switch is clicked on.

Your diffuser should now be running. If you look closely, you will observe a very fine mist coming through the slits at the top of the drop shape glass piece. Adjust the air control valve to control the output of the essential oil mist.

Essential Oils To Be Used

Only authentic, pure essential oils should be used in your diffuser. DO NOT use oils that have been diluted with a carrier such as vegetable oil. Viscous (thick) essential oils such as sandalwood, clove, patchouli etc. must be heavily blended with a less viscous essential oil to increase vaporization and avoid clogging the jet. Citrus oils pressed from the peel contain a small amount of naturally occurring vegetable oil and wax. While they can be used in your diffuser, it will be necessary to clean it more often to avoid clogging and clouding of the glass piece.

Cleaning

1) **To clean your diffuser**, fill your 15 cc bottle 1/4 full with rubbing alcohol. Simply diffuse the rubbing alcohol for a few seconds to clean the jet and clear clouding from the interior of the glass. Wipe down the exterior of the glass with alcohol. Dispose of any excess alcohol. Allow components to dry completely before diffusing essential oils again. (While diffusing alcohol, avoid breathing in the mist).

2) **If your jet is clogged:**

- a) Place an absorbent towel on your working space to catch oil drips.
- b) Turn off the air pump.
- c) Carefully remove the drop shape glass piece from the jet.

- d) Remove the jet from the 15 cc bottle.
- e) Place your finger over the small air hole located at the top of the jet.
- f) While your finger is over the air hole, turn on the air pump. The air will be forced downward to rapidly backfire the debris.
- g) Clean your diffuser with alcohol as described above. If you need further instructions, please call technical support for assistance.

TROUBLESHOOTING

- 1) No mist is coming out of the diffuser.
 - a) Be sure that the pump is plugged in and that the on/off switch is clicked on.
 - b) Turn the air control valve up all the way to create a vacuum before adjusting it down.
 - c) If you have chosen a highly viscous oil, it may need to be blended with a less viscous oil.
 - d) Your jet may be clogged with debris. Please follow the cleaning procedure described above.
 - e) Be sure that the teflon dip tube is pressed into the oil inlet on the bottom of the jet & that there is oil in your bottle.
 - f) Our jet is highly efficient and has super fine essential oil mist. Look carefully as the mist may be hard to see at first. If you still do not observe mist, please call technical support for assistance.
- 2) Your diffuser is leaking.
 - a) Be sure that you have used the proper bottle. Your jet is precisely threaded to work with European bottles only.
 - b) Check to be sure that the jet is firmly threaded onto the bottle.
 - c) Be sure that the drop shape glass piece is “locked in” to the top of the jet. To lock in the glass piece, press down on the glass piece while turning 1/16 of a turn. Use firm but cautious pressure to avoid breakage.
 - d) Check to see if the bottle is too full. Your bottle should be filled no more than 3/4 of the way to allow for proper drainage.

WARNINGS

- 1) Essential oils can dissolve the finish on furniture. Never allow essential oil to drip on furniture.
- 2) Keep your diffuser out of the reach of children and pets.
- 3) Do not allow essential oil to come in contact with eyes or mucous membranes.
- 4) Do not operate your diffuser without the drop shaped glass piece in place.

***LIMITED WARRANTY:** This diffuser is warranted against defects for one full year after the date of purchase. Time Laboratories is not responsible for claims or damage resulting from accident, neglect, or the unsafe or improper maintenance and use of this appliance.*

Pure Essential Oil Combinations

If you have purchased our Windrose Ultra Jet Diffusor DELUXE, the following Essential Oil Combinations are included at no extra charge: Breath Easy, Nite Cap, Energize.

Pure EO Combination	DESCRIPTION & USES
Alpine juniper, pine, peppermint, niaouli	Crisp, cool blend to alleviate heady pressures and congestion. Recommended for inhalation, diffusers, foot/back massage.
Appetite Balance grapefruit, peppermint, geranium	Naturally reduces cravings to help maintain a healthy body weight. Recommended for inhalation, diffusers, massage, room freshener.
Aromatic Pest-Away citronella, cedarwood, eucalyptus, peppermint	Safe and effective for you and your pets. Recommended for diffusers, pet's bedding, lotions, spritzers, cleaning additive. When used in a lotion or spritzer, re-apply every 2-3 hours for maximum effectiveness.
Beautiful Gardens floral blend	Peaceful floral blend to soothe away tension and encourage relaxation. Recommended for massage, baths, body lotion, facial oil or fragrance.
Breathe Easy bergamot, tea tree, lemon	Clears, purifies and cleanses. Recommended for inhalation, air fresheners, diffusers and massage.
Christmas Pleasures orange, spruce, cinnamon bark	Recommended for diffusers, inhalation, room freshener, foot massage (highly dilute).
Clarity rosemary, basil, petitgrain	For inhalation and diffusers to increase mental alertness and acuity. Aids memory and heightens concentration.
Composure geranium, ylang ylang, patchouli	Calming mixture with antidepressant qualities. Balances seesaw emotions and steadies mood swings. Lessens anxiety and irritability. Recommended for bath or massage.
Courage spruce, rosewood, frankincense, tanacetum annum	Balancing, euphoric, anti-inflammatory, immune enhancing. Recommended for massage, diffusers, baths, inhalation, face and body lotion.
Energize rosemary, peppermint, grapefruit	Invigorating combination to stimulate physical and mental vigor. Recommended for massage, diffusers, inhalation, room freshener.
Euphoria clary sage, rosewood, cedarwood, patchouli	A pleasurable intoxicating experience for bath, body oil or as a fragrance.
Fern Creek fir, bay, chamomile blue	Refreshing, energizing tonic. Recommended for inhalation, diffuser, room freshener, sport massage and foot bath.
Fresh Breeze eucalyptus & citrus	Enlivening respirant recommended for diffusers, room freshener, back and chest massage.
Honeymoon ylang ylang, vetiver, clary sage, patchouli	Sweet, sensual blend for massage, bath or as a fragrance.
ImmuBoost thyme, lavender, eucalyptus	Enhances immune system function. Recommended for partial body massage, diffusers, inhalation.
ImmuBoost Extra thyme, lavender, eucalyptus, balsamea	Enhances immune system function. Recommended for partial body massage, diffusers, inhalation.
ImmuBoost Spice thyme, lavender, eucalyptus, clove, cinnamon, rosemary	Enhances immune system function. Recommended for partial body massage, diffusers, inhalation.

Pure EO Combination	DESCRIPTION & USES
Inspiration frankincense, jasmine, mandarin	Spiritually uplifting. Recommended for body spritz, facial oil, fragrance, bath, massage or meditation.
Nite Cap lavender, chamomile	To relieve nighttime restlessness. Recommended for bath, compress, massage/body oil or relaxing/calming skin care.
Oasis basil, lavender, clary sage	A retreat from stressful tension, worry and mental fatigue. The ideal full body massage blend for “executive’s stress” and headaches.

Tranquility lavender, bergamot, lemon, frankincense	Balancing, uplifting blend for stress relief, mood disturbance, restlessness, insomnia, headache. Recommended for massage, diffusers, baths, inhalation, face and body lotion.
Winter Silk lavandin, rosewood, patchouli	A soft and sensual blend for baths, massage, air freshener, or as a fragrance.

General precautions:

- All essential oils and blends must be properly diluted in a suitable carrier before applying to the skin or adding to the bath. For full body massage, add 10 to 20 drops of pure essential oil or blend to 1 oz. of a suitable carrier oil or lotion. For partial body massage, add 20 to 40 drops of pure essential oil or blend to 1 oz. of a suitable vegetable carrier oil or lotion. To your fully drawn bath, add 8 to 10 drops of essential oil blended with 1-2 teaspoons natural bath gel or vegetable oil. Gently stir just before you get in.
- Always keep aromatherapy applications away from eyes.
- All aromatherapy products should be stored in a dark, cool environment, with caps or lids tightly secured.
- Consult a qualified practitioner for dilution suggestions suitable for children under 4 years of age.
- Do not take essential oils internally except upon the advice of a qualified health professional.
- If you are pregnant, consult a qualified health practitioner before using any essential oil preparation.
- *The indications listed above are not intended to replace the advice of a qualified health professional. These products are not intended to diagnose, cure, prevent or treat any disease.*

We also offer a complete line of pure and genuine single essential oils, aromatherapy skin and body care products, specialty children’s products, herbal supplements, tinctures, and more.
