

# Bitamins

A Children's Chewable Multi

Bitamins (pronounced like vitamins) is a children's Chewable Multi Vitamin & Mineral dietary supplement. It is sweetened with Xylitol, a natural sugar that supports tooth enamel. It is free of *artificial* colors, flavors, sweeteners.

## What is Xylitol?

Xylitol is a sugar alcohol that has many uses. It stops the production of tooth decay-causing acid. It enhances the remineralization of teeth. It is absorbed more slowly than sugar and it does not contribute to high blood sugar levels. It increases the activity of neutrophils and helps control oral infections of candida. Xylitol inhibits the growth of cariogenic bacteria.
