

# BladrEase

An Endobiogenic Concept™ Formula  
(A Time Labs Herbal Supplement)

Urinary tract infections (UTIs) are the second most common type of infection in the body. They account for about 8.3 million doctor visits each year. Women are especially prone to UTIs. One woman in five develops this infection during her lifetime. UTIs in men are not as common as in women but can be very serious when they do occur.

BladrEase may be useful for cystitis and Urinary Tract Infections.
