

## Important Properties (a digestive aid and so much more)

- anti-nausea,
- anti-inflammatory,
- antifatulent,
- antidiarrhoeal,
- antispasmodic,
- analgesic,
- carminative,
- demulcent,
- antimicrobial,
- immunomodulatory

## Description:

This synergistic combination of herbal extracts and essential oils helps to soothe GI complaints while promoting healthy digestion.

## What The Herbs and EO's in GI-Pro Do: (evidence-based ingredients)

1. Ginger root extract - Ginger increases intestinal muscle contraction while relaxing the gastro duodenal sphincter. This allows the gastric contents to go into the duodenum rather than reflux into the esophagus (GERDS). In fact, Ginger stimulates the bowel to propel food along the GI tract.
2. Aloe Vera juice - Best known for its marvelous effects on damaged epithelium tissue, aloe vera contains many beneficial vitamins, enzymes, minerals, sugars, amino and fatty acids.
3. Peppermint oil - used to relieve spastic discomfort of the upper gastrointestinal tract and bile ducts, irritable colon, respiratory complaints, dyspepsia, nausea, colic, and flatulence.
4. Cardamom seed oil - used as an antispasmodic, anti-nausea, it treats digestive complaints, it is antimicrobial and a tonic.
5. Wild Thyme oil - Carminative (relieve flatulence), it forces gas downward and preventing it from building up again. It stimulates digestion. Since it kills worms, it may help with these and other intestinal problems. Kills yeast (candida albicans)
6. Chamomile oil - used in herbal medicine for a sore stomach and irritable bowel syndrome. It is anti-inflammatory and bactericidal. It may also be antispasmodic and antimutagenic.
7. French Green Illite Clay - Green clays are curative volcanic ashes that detoxify and restore mineral balance. Our Illite clay contains only natural materials treated mechanically without any chemical additives. As a bacteria-destroying agent it can render contaminated water innocuous. When ingested, it travels along the digestive tract eliminating toxic agents and bacteria. It has a long use for diarrhea and other gastro intestinal problems.
8. Silica - Besides helping the body rid itself of heavy metals, Silica has been used for many years in the treatment of GI complaints, especially gas and colic.
