

Nutri-Flow

Calcium, Magnesium, Potassium and Vitamin E
For

- Leg cramps
- Restless legs
- Muscle spasms
- Runners shin pain
- Hypertension
- Cardiac arrhythmia
- Magnesium deficiency secondary to diuretic use

Nutri-Flow contains three important minerals plus vitamin E. Calcium and magnesium are two minerals which have most often been found to be deficient by USDA studies. Potassium has been found to be useful in the control of Hypertension, and Vitamin E is probably the most important anti-oxidant. This combination of nutrients has been successfully used for years when one has muscle spasms.
